"Always one step ahead of the rest."

This was Kintaro Hattori's credo for the company he founded in 1881.

It has guided Seiko ever since, through more than a century of innovation.

This principle, as well as the desire to appeal to customers' emotions, have been incorporated into our Group slogan.

"Moving ahead. Touching hearts."

Celebrating the 140th anniversary in 2021, we will continue to refine our technological expertise and sensibilities that have driven the times.

Seiko is "Moving ahead. Touching hearts."

The logo features the number '140' in a large, elegant serif font. The '4' is stylized with multiple parallel, curved lines extending from its left and right sides, creating a sense of motion or wings. A small 'th' is positioned to the right of the '0'. Below the number, the word 'Anniversary' is written in a smaller, clean sans-serif font. At the bottom of the logo, the word 'SEIKO' is displayed in a bold, all-caps sans-serif font.

Keep Going Forward

Keep Going Forward

Adventurers, people who love sports and people who accept new challenges know that the only way to truly fulfil their potential is to keep going forward with a never-say-die attitude. Prospex knows this too. Through constant innovation and by focusing on the needs of those who strive to be the best, Prospex has become the watch of choice for those who dare to dream.

PROSPEX

A modern re-interpretation of the 1970 Diver's watch commemorates the life and achievements of Naomi Uemura.

This watch bears homage to the great adventurer Naomi Uemura and commemorates the 80th anniversary of his birth. The patterned dial evokes the mountainous terrain that Uemura so loved and the dial and bezel are in the blue tones of the earth's upper atmospheric layers that only those who, like him, have been to the roof of the world can see. Powered by a movement specially designed for diver's use, Caliber 8L35, the case has a super-hard coating and the crystal is a dual-curved sapphire with anti-reflective coating on the inner surface to ensure high legibility from every angle. The watch has water resistance to 200 meters. An alternative silicone strap that has the same train track pattern as the original is also offered. The case back is engraved with Uemura's name and the individual watch's serial number.

Japanese adventurer Naomi Uemura made a record-breaking journey from Greenland to Alaska, solo expeditions to the North Pole, and was the first man in the world to climb the highest peaks on each of the five continents.

PROSPEX

The case of this limited edition watch is pure Prospex with its flowing lines and its unique asymmetrical extension that protects the crown at the four o'clock position. The case sides are carefully polished and the watch is presented on a five row steel bracelet to create a modern sharp profile. In addition to the limited edition, Prospex offers a version with the same textured dial, but in a charcoal gray color similar to the 1970 original. It shares the same case design, the same hand assembled Caliber 8L35 and the same features and specifications as the commemorative watch.

PROSPEX

The 1986 Professional Diver's 1000m 35th Anniversary Limited Edition

We celebrate the 35th anniversary of Seiko's first watch for 1000m saturation diving with a heritage design. It is inspired by the spirit of the pioneering professional divers of the 1980's and 1990's whose skill and bravery took them deeper and further than ever before. The yellow and gold color scheme allows the high legibility that brings safety to the diver. It is offered as a limited edition with an additional blue-gray silicone strap.

1986 Diver's

PROSPEX

The 1965 Diver's Modern Re-interpretation

Japan's first diver's watch returns with a unique fabric strap inspired by 'Seichu', a traditional Japanese braid knotting technique. It has a beautiful three-dimensional weave pattern and is durable, flexible and breathable.

The dial is designed for high legibility and the watch is powered by Caliber 6R35 which delivers a reserve of 70 hours.

PROSPEX

The 1970 Diver's Modern Re-interpretation

A contemporary interpretation of the 1970 diver's watch which was used by adventurer Naomi Uemura in the years 1974 to 1976 when he completed a 12,500 km solo dog-sled run from Greenland to Alaska. It is presented on Seiko's first ever fabric strap made exclusively for a diver's watch. With its classic design and its comfortable 'Seichu' fabric strap, this sports watch is equally at home on land and in the sea, powered by Caliber 6R35 which delivers a reserve of 70 hours.

PROSPEX

The 1959 Alpinist Re-creation

In 1959, Seiko created a watch called the Seiko Laurel Alpinist. Remarkably, it was the first Seiko watch ever produced with sports in mind and it blazed a trail that led to the development of many landmark timepieces in the decades that followed. It was created to meet the needs of mountain climbers and recreational field sports enthusiasts. From the start, it was well received and, over the ensuing decades, its reputation spread far beyond the Japanese market for which it was first intended. Today, the first Alpinist watch from 1959 is re-born in a re-creation that has the high functionality that characterizes the Prospex collection.

PRESAGE

Fantasy made real

Presage presents a new creation inspired by the first animation film made by Studio Ghibli, the now classic fantasy-adventure, Castle In The Sky.

The crest on the mystical levitation stone in the heroine's pendant is reproduced on the enamel dial and crown while the 'castle in the sky' is illustrated on the case back. Around the castle are engraved the words of the chant that is central to the story. The roman numerals, the retro hands and stitched leather strap complete the nostalgic atmosphere of this magical and evocative limited edition.

PRESAGE

Japanese beauty, crafted into a mechanical timepiece.

The beauty of simplicity

In every detail, the Seiko Presage Sharp Edged Series is a powerful expression of the Japanese aesthetic of simplicity in decoration. The precisely engineered and polished surfaces and the crisp edges of its silhouette contrast with the subtle hairline finish to create a pleasingly multi-dimensional effect. The dial incorporates an 'Asanoha' or hemp leaf pattern, familiar in Japanese culture for its use in design since the Heian period over a thousand years ago as a symbol of strong growth and good health.

ASTRON

The most advanced ever.

A limited edition watch inspired by the KOJIMA PRODUCTIONS' icon, Ludens

Advanced technology watchmaking meets gaming fantasy.

Seiko teams up with KOJIMA PRODUCTIONS to create an Astron GPS watch that fuses the Dual-Time 5X53 caliber with a design inspired by their signature icon Ludens.

The watch's design incorporates several design elements inspired by Ludens. The dial reflects the texture of his carbon face mask motif. The iconic KOJIMA PRODUCTIONS logo is inscribed on both the dial and the case back. On the bezel, the UTC codes are in the same font as the KOJIMA PRODUCTIONS' logo, and the studio's signature "FROM SAPIENS TO LUDENS" is discreetly engraved on the side of the bezel. It is offered as a limited edition in a special presentation box with a message card from Hideo Kojima with Ludens wearing an Astron watch. Fantasy and advanced technology, together.
