## CASING PARTS LIST

# How to use the table of casing parts list

This SEIKO Casing Parts List includes all necessary casing parts for after-sale servicing. The table of casing parts is classified by calibre number in numerical order and each necessary casing part can be checked by the case number which serves as an index.

The case number is engraved on the surface of the case back of each watch for identification.

## Notes:

1. In case two or three parts numbers are described in the same column, these parts are interchangeable.
2. The mark (—) in each column indicates that the described parts in the head column are not used.
3. Some blank columns (except the "Note" column) indicate that the parts mentioned in the head column are not supplied, but some substitute parts are available for dial.
4. In the '78 edition of "SEIKO Casing Parts List," the dial parts numbers of the newly added models are increased from nine to twelve in figure. [Ex. 6319-600LS (current model), 6319-600L 0313 (new model)].  
The dials with twelve-figure parts numbers are in harmony with the models in design. For the convenience of dial selection, their watch reference numbers and dial colors also are indicated in the list.

# How to order the casing parts

When you place an order for the casing parts, please be sure to write the complete Parts Nos. stated on the '78 SEIKO Casing Parts List.

This will enable us to make an efficient and speedy of the casing parts.

Inadequate and insufficient Parts Nos. stated on your order sheet will make it difficult for us to supply the casing parts or require comparatively long time for shipment.

## Notes:

1. When production of the watches is discontinued for five years, the casing parts of these watches are not available.
2. This '78 SEIKO Casing Parts List for overseas does not include models marketed only in Japan.
